

Manufacturer Disclosure Statement for Medical Device Security – MDS²

DEVICE DESCRIPTION

| | | | |
|--|------------------------------|--|-----------------------|
| Device Category | Manufacturer | Document ID | Document Release Date |
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 |
| Device Model | Software Revision | | Software Release Date |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | | 24th July 2020 |
| Manufacturer or Representative Contact Information | Company Name | Manufacturer Contact Information | |
| | EchoNous, Inc. | 8310 154th Ave NE, Ste 200 Redmond WA 98052-3864 Tel: 1-844-854-0800 Kile.Jackson@echonous.com | |
| | Representative Name/Position | Kile Jackson / Customer Service Manager | |

Intended use of device in network-connected environment:
 The system is for non-invasive imaging of the human body for the following applications: Abdominal, Musculoskeletal, Pediatric, Small Organ and Vascular Access. The system can also be used to obtain an image of the bladder that is used to automatically determine bladder volume. The device may receive software updates over the network. The device may transmit medical record data to a remote system.

MANAGEMENT OF PRIVATE DATA

| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | Yes, No, N/A, or See Note | # Note |
|--|--|---------------------------|--------|
| A | Can this device display, transmit, or maintain private data (including electronic Protected Health Information) | Yes | 1 |
| B | Types of private data elements that can be maintained by the device : | | |
| B.1 | Demographic (e.g., name, address, location, unique identification number)? | Yes | 2 |
| B.2 | Medical record (e.g., medical record #, account #, test or treatment date, device identification number)? | Yes | 2 |
| B.3 | Diagnostic/therapeutic (e.g., photo/radiograph, test results, or physiologic data with identifying | Yes | 2 |
| B.4 | Open, unstructured text entered by device user/operator ? | Yes | 2 |
| B.5 | Biometric data ? | No | — |
| B.6 | Personal financial information? | No | — |
| C | Maintaining private data - Can the device : | | |
| C.1 | Maintain private data temporarily in volatile memory (i.e., until cleared by power-off or reset)? | Yes | 3 |
| C.2 | Store private data persistently on local media? | Yes | 3 |
| C.3 | Import/export private data with other systems? | Yes | 3 |
| C.4 | Maintain private data during power service interruptions? | Yes | 3 |
| D | Mechanisms used for the transmitting, importing/exporting of private data – Can the device : | | |
| D.1 | Display private data (e.g., video display, etc.)? | Yes | 4 |
| D.2 | Generate hardcopy reports or images containing private data ? | Yes | 4 |
| D.3 | Retrieve private data from or record private data to removable media (e.g., disk, DVD, CD-ROM, tape, CF/SD card, memory stick, etc.)? | No | — |
| D.4 | Transmit/receive or import/export private data via dedicated cable connection (e.g., IEEE 1073, serial port, USB, FireWire, etc.)? | Yes | 4 |
| D.5 | Transmit/receive private data via a wired network connection (e.g., LAN, WAN, VPN, intranet, Internet, | No | — |
| D.6 | Transmit/receive private data via an integrated wireless network connection (e.g., WiFi, Bluetooth, | Yes | 4 |
| D.7 | Import private data via scanning? | No | — |
| D.8 | Other? | N/A | — |
| Management of Private Data notes: | 1. The device can be configured so no ePHI data is displayed or stored. However, it is also possible to configure the system to display, store and send ePHI data. 2. ePHI data displayed and stored - Patient name, unique ID, Organisation name, test date, ultrasound images, unstructured notes and annotations. 3. Where ePHI is entered, it is stored in volatile memory for the duration of the exam (study), saved persistently on local media when local storage is enabled, and sent to remote storage when remote storage is configured. 4. For the duration of an exam, if ePHI is entered it is displayed on the local display. Hardcopy reports can be generated with the ePHI information. Where local storage is enabled, the ePHI information can be accessed via a USB cable from a host computer and appropriate security settings should be enforced (setting an Android tablet display password) | | |

| | | | |
|--|-------------------|-------------|-----------------------|
| Device Category | Manufacturer | Document ID | Document Release Date |
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 |
| Device Model | Software Revision | | Software Release Date |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | | 24th July 2020 |

SECURITY CAPABILITIES

| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | Yes, No, N/A, or See Note | # Note |
|--|---|---------------------------|--------|
| 1 | AUTOMATIC LOGOFF (ALOF) The device's ability to prevent access and misuse by unauthorized users if device is left idle for a period of time. | | |
| 1-1 | Can the device be configured to force reauthorization of logged-in user(s) after a predetermined length of inactivity (e.g., auto-logout, session lock, password protected screen saver)? | Yes | 5 |
| 1-1.1 | Is the length of inactivity time before auto-logout/screen lock user or administrator configurable? (Indicate time [fixed or configurable range] in notes.) | Yes | 5 |
| 1-1.2 | Can auto-logout/screen lock be manually invoked (e.g., via a shortcut key or proximity sensor, etc.) by the user ? | Yes | 5 |
| ALOF notes: | 5. The system provides the ability to configure a system-wide (rather than user-specific) screen lock that is configurable via the system setting. | | |
| 2 | AUDIT CONTROLS (AUDT) The ability to reliably audit activity on the device . | | |
| 2-1 | Can the medical device create an audit trail ? | No | — |
| 2-2 | Indicate which of the following events are recorded in the audit log: | | |
| 2-2.1 | Login/logout | N/A | — |
| 2-2.2 | Display/presentation of data | N/A | — |
| 2-2.3 | Creation/modification/deletion of data | N/A | — |
| 2-2.4 | Import/export of data from removable media | N/A | — |
| 2-2.5 | Receipt/transmission of data from/to external (e.g., network) connection | N/A | — |
| 2-2.5.1 | Remote service activity | N/A | — |
| 2-2.6 | Other events? (describe in the notes section) | N/A | — |
| 2-3 | Indicate what information is used to identify individual events recorded in the audit log: | | |
| 2-3.1 | User ID | N/A | — |
| 2-3.2 | Date/time | N/A | — |
| AUDT notes: | | | |
| 3 | AUTHORIZATION (AUTH) The ability of the device to determine the authorization of users. | | |
| 3-1 | Can the device prevent access to unauthorized users through user login requirements or other mechanism? | Yes | 6 |
| 3-2 | Can users be assigned different privilege levels within an application based on 'roles' (e.g., guests, regular users , power users , administrators, etc.)? | Yes | 6 |
| 3-3 | Can the device owner/ operator obtain unrestricted administrative privileges (e.g., access operating system or application via local root or admin account)? | No | 6 |
| AUTH notes: | 6. The system provides a system-wide screen lock to prevent unauthorized access. Access to PHI information may be controlled to individual user logins. Access to Ultrasound scanning functionality may be limited via a password. Access to settings may be limited via an administrator password. | | |

| Device Category | Manufacturer | Document ID | Document Release Date | |
|--|---|-----------------------|---------------------------|--------|
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 | |
| Device Model | Software Revision | Software Release Date | | |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | 24th July 2020 | | |
| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | | Yes, No, N/A, or See Note | # Note |
| 4 | CONFIGURATION OF SECURITY FEATURES (CNFS) | | | |
| | The ability to configure/re-configure device security capabilities to meet users' needs. | | | |
| 4-1 | Can the device owner/operator reconfigure product security capabilities ? | Yes | 7 | |
| CNFS notes: | 7. The device administrator may configure a number of settings/restrictions via the settings. | | | |
| 5 | CYBER SECURITY PRODUCT UPGRADES (CSUP) | | | |
| | The ability of on-site service staff, remote service staff, or authorized customer staff to install/upgrade device's security patches. | | | |
| 5-1 | Can relevant OS and device security patches be applied to the device as they become available? | Yes | — | |
| | 5-1.1 Can security patches or other software be installed remotely? | No | — | |
| CSUP notes: | | | | |
| 6 | HEALTH DATA DE-IDENTIFICATION (DIDT) | | | |
| | The ability of the device to directly remove information that allows identification of a person. | | | |
| 6-1 | Does the device provide an integral capability to de-identify private data ? | See Note | 8 | |
| DIDT notes: | 8. De-identification is performed on data sent to the manufacturer to improve the product. The sending of this data requires an opt-in from the customer. | | | |
| 7 | DATA BACKUP AND DISASTER RECOVERY (DTBK) | | | |
| | The ability to recover after damage or destruction of device data, hardware, or software. | | | |
| 7-1 | Does the device have an integral data backup capability (i.e., backup to remote storage or removable media such as tape, disk)? | No | — | |
| DTBK notes: | | | | |
| 8 | EMERGENCY ACCESS (EMRG) | | | |
| | The ability of device users to access private data in case of an emergency situation that requires immediate access to stored private data . | | | |
| 8-1 | Does the device incorporate an emergency access ("break-glass") feature? | No | — | |
| EMRG notes: | | | | |
| 9 | HEALTH DATA INTEGRITY AND AUTHENTICITY (IGAU) | | | |
| | How the device ensures that data processed by the device has not been altered or destroyed in an unauthorized manner and is from the originator. | | | |
| 9-1 | Does the device ensure the integrity of stored data with implicit or explicit error detection/correction technology? | Yes | 9 | |
| IGAU notes: | 9. Implicit error detection/correction is implemented in the internal flash storage file system, and the wireless communication protocols supported. | | | |

| Device Category | Manufacturer | Document ID | Document Release Date | |
|--|--|-----------------------|---------------------------|--------|
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 | |
| Device Model | Software Revision | Software Release Date | | |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | 24th July 2020 | | |
| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | | Yes, No, N/A, or See Note | Note # |
| 10 | MALWARE DETECTION/PROTECTION (MLDP) | | | |
| | The ability of the device to effectively prevent, detect and remove malicious software (malware). | | | |
| 10-1 | Does the device support the use of anti-malware software (or other anti-malware mechanism)? | | No | — |
| 10-1.1 | Can the user independently re-configure anti-malware settings? | | N/A | — |
| 10-1.2 | Does notification of malware detection occur in the device user interface? | | N/A | — |
| 10-1.3 | Can only manufacturer-authorized persons repair systems when malware has been detected? | | N/A | — |
| 10-2 | Can the device owner install or update anti-virus software ? | | No | — |
| 10-3 | Can the device owner/ operator (technically/physically) update virus definitions on manufacturer-installed anti-virus software ? | | No | — |
| MLDP notes: | | | | |
| 11 | NODE AUTHENTICATION (NAUT) | | | |
| | The ability of the device to authenticate communication partners/nodes. | | | |
| 11-1 | Does the device provide/support any means of node authentication that assures both the sender and the recipient of data are known to each other and are authorized to receive transferred information? | | No | 10 |
| NAUT notes: | 10. Communication to the software update server uses a key to authenticate the client device. | | | |
| 12 | PERSON AUTHENTICATION (PAUT) | | | |
| | Ability of the device to authenticate users | | | |
| 12-1 | Does the device support user/operator -specific username(s) and password(s) for at least one user ? | | Yes | 11 |
| 12-1.1 | Does the device support unique user/operator -specific IDs and passwords for multiple users? | | Yes | 11 |
| 12-2 | Can the device be configured to authenticate users through an external authentication service (e.g., MS Active Directory, NDS, LDAP, etc.)? | | No | |
| 12-3 | Can the device be configured to lock out a user after a certain number of unsuccessful logon attempts? | | No | |
| 12-4 | Can default passwords be changed at/prior to installation? | | N/A | 12 |
| 12-5 | Are any shared user IDs used in this system? | | Yes | 13 |
| 12-6 | Can the device be configured to enforce creation of user account passwords that meet established complexity rules? | | No | |
| 12-7 | Can the device be configured so that account passwords expire periodically? | | No | — |
| PAUT notes: | 11. Access to PHI data may be controlled through user-specific usernames and passwords. 12. There are no default passwords. 13. The system allows both an administrator password, and a password to limit access to Ultrasound scanning functionality. These are password only, and thus shared. | | | |
| 13 | PHYSICAL LOCKS (PLOK) | | | |
| | Physical locks can prevent unauthorized users with physical access to the device from compromising the integrity and confidentiality of private data stored on the device or on removable media . | | | |
| 13-1 | Are all device components maintaining private data (other than removable media) physically secure (i.e., cannot remove without tools)? | | Yes | — |
| PLOK notes: | | | | |

| Device Category | Manufacturer | Document ID | Document Release Date | |
|--|--|-----------------------|---------------------------|----|
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 | |
| Device Model | Software Revision | Software Release Date | | |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | 24th July 2020 | | |
| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | | Yes, No, N/A, or See Note | # |
| 14 ROADMAP FOR THIRD PARTY COMPONENTS IN DEVICE LIFE CYCLE (RDMP) | | | | |
| Manufacturer's plans for security support of 3rd party components within device life cycle. | | | | |
| 14-1 | In the notes section, list the provided or required (separately purchased and/or delivered) operating system(s) - including version number(s). | | N/A | — |
| 14-2 | Is a list of other third party applications provided by the manufacturer available? | | No | — |
| RDMP notes: | | | | |
| 15 SYSTEM AND APPLICATION HARDENING (SAHD) | | | | |
| The device's resistance to cyber attacks and malware . | | | | |
| 15-1 | Does the device employ any hardening measures? Please indicate in the notes the level of conformance to any industry-recognized hardening standards. | | Yes | 14 |
| 15-2 | Does the device employ any mechanism (e.g., release-specific hash key, checksums, etc.) to ensure the installed program/update is the manufacturer-authorized program or software update? | | Yes | 15 |
| 15-3 | Does the device have external communication capability (e.g., network, modem, etc.)? | | Yes | 16 |
| 15-4 | Does the file system allow the implementation of file-level access controls (e.g., New Technology File System (NTFS) for MS Windows platforms)? | | Yes | — |
| 15-5 | Are all accounts which are not required for the intended use of the device disabled or deleted, for both users and applications? | | N/A | — |
| 15-6 | Are all shared resources (e.g., file shares) which are not required for the intended use of the device , disabled? | | Yes | 17 |
| 15-7 | Are all communication ports which are not required for the intended use of the device closed/disabled? | | Yes | 17 |
| 15-8 | Are all services (e.g., telnet, file transfer protocol [FTP], internet information server [IIS], etc.), which are not required for the intended use of the device deleted/disabled? | | Yes | 17 |
| 15-9 | Are all applications (COTS applications as well as OS-included applications, e.g., MS Internet Explorer, etc.) which are not required for the intended use of the device deleted/disabled? | | Yes | — |
| 15-10 | Can the device boot from uncontrolled or removable media (i.e., a source other than an internal drive or memory component)? | | No | — |
| 15-11 | Can software or hardware not authorized by the device manufacturer be installed on the device without the use of tools? | | No | — |
| SAHD notes: | | | | |
| 14. The device has no incoming ports open and has unused applications disabled through the use of the device administrator feature of Android. There is no specific conformance to any particular hardening standards. | | | | |
| 15. Signatures of all applications are checked before installation. | | | | |
| 16. The device has Wi-Fi. | | | | |
| 17. The device provides no services (no incoming ports). | | | | |
| 16 SECURITY GUIDANCE (SGUD) | | | | |
| The availability of security guidance for operator and administrator of the system and manufacturer sales and service. | | | | |
| 16-1 | Are security-related features documented for the device user ? | | Yes | 18 |
| 16-2 | Are instructions available for device/media sanitization (i.e., instructions for how to achieve the permanent deletion of personal or other sensitive data)? | | Yes | 18 |
| SGUD notes: | | | | |
| 18. Security options are explained in the system user manual (P003948). | | | | |

| Device Category | Manufacturer | Document ID | Document Release Date | |
|---|---|-----------------------|---------------------------|----|
| Ultrasound Imaging System | EchoNous, Inc. | D007127 | 24th July 2020 | |
| Device Model | Software Revision | Software Release Date | | |
| EchoNous Bladder / EchoNous Vein / Uscan | 4.5.1 | 24th July 2020 | | |
| Refer to Section 2.3.2 of this standard for the proper interpretation of information requested in this form. | | | Yes, No, N/A, or See Note | # |
| 17 HEALTH DATA STORAGE CONFIDENTIALITY (STCF) | | | | |
| The ability of the device to ensure unauthorized access does not compromise the integrity and confidentiality of private data stored on device or removable media . | | | | |
| 17-1 | Can the device encrypt data at rest? | | Yes | 19 |
| STCF notes: | 19. The internal storage is encrypted and is protected via the device password. | | | |
| 18 TRANSMISSION CONFIDENTIALITY (TXCF) | | | | |
| The ability of the device to ensure the confidentiality of transmitted private data . | | | | |
| 18-1 | Can private data be transmitted only via a point-to-point dedicated cable? | | No | — |
| 18-2 | Is private data encrypted prior to transmission via a network or removable media ? (If yes, indicate in the notes which encryption standard is implemented.) | | Yes | 20 |
| 18-3 | Is private data transmission restricted to a fixed list of network destinations? | | No | — |
| TXCF notes: | 20. All data transmitted via Wi-Fi is protected via Wi-Fi security mechanisms. Other security is protocol dependent. BOX export and Signostics upload is protected via HTTPS. | | | |
| 19 TRANSMISSION INTEGRITY (TXIG) | | | | |
| The ability of the device to ensure the integrity of transmitted private data . | | | | |
| 19-1 | Does the device support any mechanism intended to ensure data is not modified during transmission? (If yes, describe in the notes section how this is achieved.) | | Yes | 21 |
| TXIG notes: | 21. Some file types transmitted (such as PNG) include checksums. The USB protocol and Wi-Fi protocols include individual packet checksums. | | | |
| 20 OTHER SECURITY CONSIDERATIONS (OTHR) | | | | |
| Additional security considerations/notes regarding medical device security. | | | | |
| 20-1 | Can the device be serviced remotely? | | No | — |
| 20-2 | Can the device restrict remote access to/from specified devices or users or network locations (e.g., specific IP addresses)? | | No | — |
| 20-2.1 | Can the device be configured to require the local user to accept or initiate remote access? | | N/A | — |
| OTHR notes: | | | | |
