

KOSMOS® with TRANSCRANIAL DOPPLER (TCD)

Easy and Portable Solution for Ultrasound Vascular Exams

By integrating Transcranial Doppler (TCD) into the Kosmos platform, we've transformed complex cerebral blood flow evaluation into a streamlined, highly portable experience. Designed specifically for the Torso-One probe, our dedicated TCD preset enables rapid assessment of stroke and vasospasm via the transtemporal window—complete with integrated PW calculations. Kosmos delivers elite vascular capabilities in a ultraportable form factor.

Modes

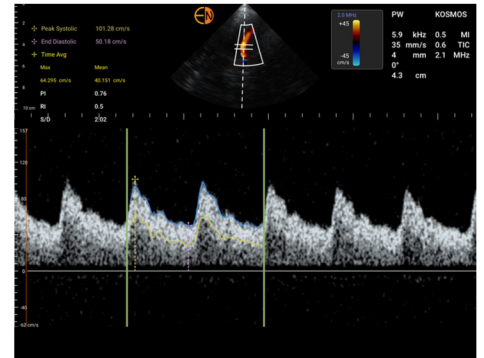

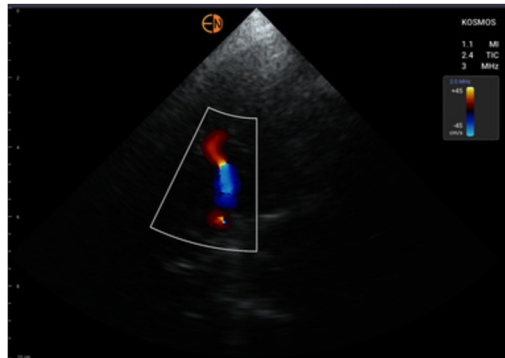

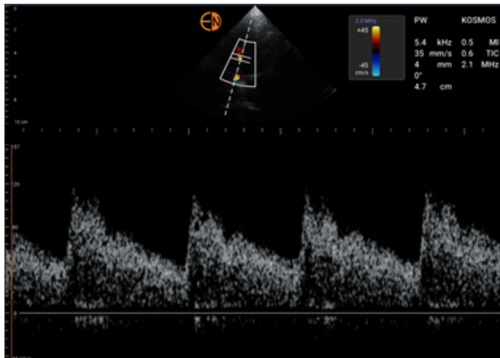

B-mode
PW Doppler
Color Doppler

PW Gate Depth Display

Sample volume depth is displayed to pinpoint depth of the interrogated vessel in a complex anatomical region.

Calculation Package

Comprehensive calculation package including pulsatility index, resistive index, S/D ratio, and time-averaged velocities
